SUMMARY

IT systems and infrastructure professional. B.S. in Information Technology, University of South Florida (Dec 2024); M.S. in Electrical Engineering, Systems & Security track, in progress. Architect and operate a three-node virtualized environment with segmented networking, ZFS storage, zero-trust remote access, and automated backups, and provision AWS infrastructure as code with Terraform. U.S. citizen, eligible for a security clearance. Seeking cloud and infrastructure engineering roles in Tampa Bay.

TECHNICAL SKILLS

Systems & Virtualization: Proxmox VE, TrueNAS SCALE, ZFS, Docker, Linux admin, Active Directory (user and group administration)
Networking & Security: OPNsense firewall, VLAN segmentation, DNS/DHCP, split-horizon DNS, Nginx reverse proxy, TLS/certificate management
Cloud & Scripting: AWS (S3, CloudFront, IAM, Lambda, CloudWatch), Terraform, Azure, Python, Bash, SQL (PostgreSQL, SQL Server, MySQL), JavaScript / TypeScript

INFRASTRUCTURE EXPERIENCE

Home Infrastructure — Architect and Administrator

- Design and operate a three-node Proxmox VE cluster with HA and ZFS replication, hosting 15+ production services at 99% uptime; track availability in Uptime Kuma and maintain NetBox as the IPAM source of truth.
- Run TrueNAS SCALE as a VM with a PCIe-passed-through LSI HBA managing an 8 TB ZFS mirror; maintain scheduled snapshots and backups with verified restores.
- Segment the network with managed VLANs and OPNsense firewall policy backed by threat-intelligence block lists, including an isolated WAN VLAN for router failover.
- Provide zero-trust remote access via Twingate and Tailscale/NetBird mesh VPN with no exposed inbound ports; route services through Nginx reverse proxy with split-horizon DNS and Cloudflare-managed TLS.
- Diagnosed a recurring ZFS pool fault that survived SMART checks and three resilvers; isolated it to a marginal SATA power connection, corrected it, and restored the pool to a clean state.

EXPERIENCE

Product Lead <i>Eleganza Sarasota</i>	June 2021 – Present <i>Sarasota, FL</i>
• Built a Python pipeline integrating Square POS, Squarespace, and Google Analytics REST APIs for real-time inventory and sales visibility across 500+ SKUs. • Automated twice-daily inventory synchronization between point-of-sale and e-commerce platforms, eliminating ~2 hours of weekly manual reconciliation and reducing data-entry errors.	
Technical Content Creator <i>Big Ibz (bigibz.com)</i>	2025 – Present <i>Tampa, FL</i>
• Produce technical explainers and written guides on virtualization, networking, storage, and self-hosting for an audience of 83K+ across TikTok, Instagram, and YouTube (~5M monthly views).	
Customer Service Staff <i>Publix Super Markets</i>	2025 – Present <i>Tampa Bay, FL</i>
• Resolve customer issues, returns, and point-of-sale escalations in a high-volume retail environment.	
Software Development Intern <i>The Global Tech Experience</i>	June 2023 – Aug 2023 <i>Remote</i>
• Built an interactive dashboard SPA (JavaScript, Chart.js, REST APIs) with a 4-person Agile team, delivering an MVP on a 6-week sprint cycle.	

PROJECTS

- AWS static site — Terraform, S3, CloudFront: provisioned a private S3 origin behind CloudFront with Origin Access Control and HTTPS-only delivery, defined entirely as code; remote Terraform state in S3 with lockfile locking (github.com/IbrahimElsa/aws-terraform-static-site).
- folio.dev — TypeScript, Next.js, PostgreSQL: co-founded a multi-tenant SaaS portfolio platform with GitHub OAuth, row-level tenant isolation, and GitHub Actions CI/CD.

EDUCATION & CERTIFICATIONS

M.S. Electrical Engineering - Systems & Security Track - University of South Florida	In progress, started Fall 2026
B.S. Information Technology - University of South Florida	Dec 2024
Certifications: Google IT Support Professional Certificate USF Web Development Program Certificate
